Summary

Final-year Electronics and Telecommunication engineer seeking an Associate DevOps / Cloud Engineer role. Architected a serverless AWS backend across the full SDLC, containerized a React dashboard with Docker, and automated CI/CD with GitHub Actions. Hands-on with Linux, Python, Bash, Terraform, Docker Compose, AWS EC2/VPC and Jenkins.

Skills

Cloud: AWS (Lambda, API Gateway, DynamoDB, S3, IAM, CloudWatch, Cognito, EC2, VPC), Firebase

DevOps: Docker, Docker Compose, GitHub Actions, Jenkins, CI/CD pipelines, Terraform (project experience), Git, GitHub

Programming & Scripting: Python (REST APIs, Automation), Bash, PowerShell, C, SQL

Systems & Networking: Linux (Ubuntu), Windows, TCP/IP, DNS, HTTP/HTTPS, SSH

Practices: SDLC, Agile/Scrum, Git Branching Strategies, Troubleshooting, Technical Documentation

Observability: AWS CloudWatch, Application Logging, Log Analysis

Spoken Languages: English, Hindi, Marathi, Kannada

Work Experience

Embedded Systems Intern May 2025 – Jun 2025
Codec Technologies India *Remote*

- Troubleshot and resolved 10+ integration defects across 2 embedded modules, unblocking production release, by debugging UART and I^2C interfaces in C via serial-log analysis.
- Maintained 2 active Git branches using feature-branching and pull-request workflows, keeping commit history clean and documentation current for conflict-free peer review.
- Streamlined firmware testing on Embedded Linux by scripting firmware flashing, serial-log capture and test runs in the Linux terminal.

Projects

LabPulse – Cloud-Based Lab Monitoring System | *Cloud Architecture Lead, DevOps, Backend (team of 3)* 2026

- Architected a serverless AWS backend (3 Lambda functions, 3 API Gateway endpoints, 7 DynamoDB tables) with IAM access control and CloudWatch logging.
- Automated image builds on every push by writing a Dockerfile to containerize the React dashboard and building a GitHub Actions CI/CD pipeline.
- Engineered a Python telemetry agent streaming session data over HTTPS from 3 lab machines; automated one-step rollout with PowerShell and Windows Scheduled Tasks.
- Hardened security with Cognito JWT authentication, SHA-256 API key hashing and role-based access control (Admin, Faculty).
- Applied Terraform, Docker Compose, AWS EC2/VPC and Jenkins to make environment setup and deployment repeatable and automated.

Tech Stack: AWS Lambda, API Gateway, DynamoDB, Cognito, Terraform, Docker, Docker Compose, GitHub Actions, Jenkins, EC2, VPC, Python, React, PowerShell

Air Guitar – Real-Time Sensor-to-Audio Pipeline | *Solo Project* 2025

- Built a modular real-time pipeline in which an Arduino streams MPU6050 accelerometer data over I^2C and serial to Python, synthesizing 6 virtual guitar strings via the Karplus-Strong algorithm (NumPy, sounddevice).

Tech Stack: Python, NumPy, Arduino, I^2C, Serial Communication

Education

Bachelor of Technology (B.Tech), Electronics and Telecommunication Engineering Expected 2027
Walchand Institute of Technology, Solapur CGPA: 9.27

Higher Secondary (12th), *D.H.B Soni College, Solapur* 2023 | 83%

Certifications & Achievements

- AWS APAC Solutions Architecture Job Simulation (2025); Hacktoberfest Contributor (open-source contributions)
- 2x Winner, Electronic Quiz Competition (Quizotronics); Runner-up, State-level Chess Championship; 4+ Hackathons
